
net flux $F_q^{\text{net}} = \sum_b (F_{b,q}^{\uparrow} - F_{b,q}^{\downarrow})$, q = 0 ... 4

surface output: $\sum_b F_{b,0}^{\downarrow}$; top output: $\sum_b F_{b,4}^{\uparrow}$

net_flux_midpt, entry q: DISORT bands add level q,

Toon bands add the midpoint of layer q - 1 (nothing at q = 0)
